

# Bird Guiding in Kristianstad, Sweden

## Wintertime

### Eagles and Owls

All year round the White-tailed Seagull is often seen. At wintertime they gather - as much as 22 seen together. Golden Eagle and Rough-legged Buzzard may also show up. In the woods there are Eurasian Pygmy Owl, Tengmalm's Owl.

## Early Springtime

### Cranes dancing

Thousands of Cranes gather at one spot to dance, find a partner and move on (klimax in late march/beginning of April). Later you can find groups still migrating or pairs hatching deep in wet woodlands

### Black Grouse dancing

See the magnificent play of this mysterious bird of the woodlands. Early mornings in March - May.

## Migrators

These are migrators which you have some chance to see under certain periods: **Spotted Redshank, Rough-legged Buzzard**. More difficult are **Broad-billed Sandpiper, Red-necked Phalarope, Great Snipe**.

## Late Spring and Summer

### Hatching birds

Following birds are hatching at specific spots and will hopefully be seen there.

#### Almost certain:

Black Woodpecker  
Eurasian penduline Tit  
Common Rosefinch  
European White Stork  
Red-necked Grebe  
Thrush Nightingale  
Black Tern

Common Crane  
Icterine Warbler  
Tawny Pipit  
Red Kite  
Arctic Diver  
European Serin

#### Good chances:

Osprey  
Red-breasted Flycatcher  
Eurasian Wryneck  
Eurasian Golden Oriole

Caspian Tern  
Spotted Nutcracker  
Eurasian Eagle Owl  
Crested Tit

### Rare visitors

You will be instantly updated with local birdreports, as long as you stay close to your guide. Good possibility for River Warbler.

## It's simple! ...

### Over the day

- Pick me up - we plan - we go

### Several days
